

What is Trusscore Wall&CeilingBoard?

Trusscore Wall&CeilingBoard is a true alternative to drywall. The PVC panels are bright, smooth, strong, abuse-resistant and unaffected by moisture. Contractors love Wall&CeilingBoard because the speed and ease of install drives up their profit margin and no special skills or subcontractors are required. Your customers get a fast, low-cost install with a high-end finish, and you get happy customers.

Product Features

- Installs up to 4x quicker than drywall
- Simple tongue and groove installation
- Won't support the growth of mold or mildew
- Damage-resistant and colorfast, so no paint necessary
- Integrates seamlessly with Trusscore SlatWall
- 16" wide panels
- Available in standard lengths: 10', 12', 14', 16' & 20'
- Available in white and gray

Why Stock Trusscore Wall&CeilingBoard?

- Receive leads directly from Trusscore
- **Up-Sell Opportunity** — Wall&CeilingBoard is a higher priced, higher margin product than drywall, a low margin commodity
- **Low labor costs** — Lower installed cost of Wall&CeilingBoard makes an overall project more cost-effective than painted drywall
- **Differentiate yourself from your competitors** — By stocking Trusscore, you can offer your customers innovative products backed by material science
- **Narrow SKU requirements** — Lower inventory space and dollar investment required to support the product line
- **A solution for a wide variety of commercial applications** — Offices, car/truck washes, commercial kitchens, food processing facilities, healthcare, restaurants, plus many residential and agricultural applications

Trusscore Wall&CeilingBoard is perfect for commercial applications

Car washes

Indoor car wash and commercial truck wash facilities must be low maintenance. Trusscore Wall&CeilingBoard panels are exactly that. They're scratch-resistant and colorfast — meaning they never need to be painted, coated, or sealed — which greatly reduces maintenance costs.

Detergents, soaps and waxes are no match for the easy to clean, impervious, and chemical-resistant Wall&CeilingBoard panels.

Food processing facilities

Sanitation and food safety go hand-in-hand. That's why Trusscore Wall&CeilingBoard is fully compliant with requirements set out by the Food and Drug Administration (FDA), and U.S. Department of Agriculture (USDA) for areas where food is prepared. The product also meets Current Good Manufacturing Practice (CGMP) facility requirements.

Commercial kitchens

Customers can depend on Trusscore to keep their commercial kitchen clean, bright, and looking professional. Commercial kitchens look to Trusscore Wall&CeilingBoard because the panels are easy to install, cost-effective, and have a bright white finish that enhances the available light. Since the panels are impervious to moisture, humidity from cooking is a non-issue and they stand up to repeated cleaning.
